

# Summary

## CSS works with Rules

```
h1 {  
  color: red;  
}  
p {  
  color: red;  
}
```

## Different Types of Selectors

```
h1 {...}  
.some-class {...}  
[disabled] {...}  
#some-id {...}  
* {...}
```

## Selectors with Combinators

```
div + p {  
  color: red;  
}  
div ~ p {  
  color: red;  
}  
div > p {  
  color: red;  
}  
div p {  
  color: red;  
}
```

## Properties & Values

- Long list of available Properties and Values
- Check MDN or comparable References
- Different Type of Values, depending on Properties

## Inheritance & Specificity

- Parent styles are generally inherited
- Multiple rules can apply to one element
- Specificity resolves “multiple rules” conflicts
- Inheritance defaults can be changed
